

eXtplorer - PHP-based File Manager - Fehler #129

php compression using ob_gzhandler causes Extplorer to fail

07/04/2013 04:02 PM - Herman Braam

Status:	Neu		
Priority:	Normal		
Assignee:	Sören Eberhardt-Biermann		
Category:	Bug		
Target version:			
eXtplorer Version:	2.1.2	Joomla! Version:	Joomla! 3.0
Description			
I am compressing my PHP files on the fly with GZIP using			
php_value output_handler ob_gzhandler			
in my .htaccess file. This causes eXtplorer to render gibberish when used standalone and hang when used in Joomla.			
Using a local .htaccess for eXtplorer turning te compression off like:			
php_value output_handler none			
solves the issue.			
Is eXtplorer not compatible with ob_gzhandler?			
I am using version 2.1.3
