eXtplorer Version:	2.1.4		
		Joomla! Version:	none
Description			
Hi all			
I setup Extplorer as standalone GUI for VSFTPD server. The authentication is set to FTP. Everything is working fine except logout procedure.			
When i try to logout, the browser show a blank page and stop there, no return to login page.			
Please advice how to solve this.			
Best regards, Alex

May be this could help:

This error is showed in httpd log:

PHP Fatal error: Call to undefined method InputFilter::process() in /www/extplorer/include/functions.php on line 1357, referer: <http://ftpfiles.mastersystem.ro/>

#2 - 01/23/2018 08:07 PM - Alan Milinovic

I have the same problem.
