Description		
<p>Hi everybody i've been trying to install extploer in my website with joomla 1.5 The package is correctly updated and installed, but when i go to component - Extplorer starts loading a page and starts a non-stop autorefresh, the only things that i can see is the Extplorer logo and "Current mode: extplorer [Esci]. You could switch to ftp mode." Can someone help me? thanks a lot! Tommaso</p>
