Description

I was using this just 2 days ago and had no problems, here is the item that is the problem
http://www.lccnisswa.org/administrator/scripts/editarea/edit_area_full_with_plugins.js

it showing in mozilla as pending the initiator is index.php:442 Parser

the top portion of your mod shows but the lower portion doesn't show up and just keeps reloading.

History

#1 - 11/15/2012 01:00 AM - steve lanz

Reverted to 2.5.7 and the problem no longer happens, could be the 2.5.8 upgrade

Thanks

Steve
